

INDEX TO VOL. XX.

ABBOTT, F. M. See **LOMBARD** and **ABBOTT, I.**

Amandin, hydrolysis of, 470.

Animal holder, 362.

Annunciator for use in metabolism experiments, 358.

AUER, J. See **MELTZER** and **AUER**, 259.

Automatism of respiratory and cardiac mechanisms, 407.

BECHT, F. C. See **CARLSON, GREER,** and **BECHT**, 180.

Blood pressure, during gastric and peritoneal stimulation, 74.

—, in shock, 500.

—, related to respiratory movements, 451.

Bone ash, in diet, 343.

BROWN, E. D. See **SOLLMANN, BROWN,** and **WILLIAMS**, 74.

CANNON, W. B. The acid control of the pylorus, 283.

CARLSON, A. J., J. R. GREER, and **F. C. BECHT.** The relation between the blood supply to the submaxillary gland and the character of the chorda and the sympathetic saliva in the dog and the cat, 180.

CARLSON, A. J., and **F. C. MCLEAN.** Further studies on the relation of the oxygen supply of the salivary glands to the composition of the saliva, 457.

Cerebral vessels, action of drugs on, 206.

CLAPP, S. H. See **OSBORNE** and **CLAPP**, 470, 477, 494.

Colloidal solutions, osmotic pressure of, 127.

ELECTROLYTES affect osmotic pressure of colloidal solutions, 127.

Embryo, enzymes in, 81, 97.

—, glycogen in, 117.

Enzymes, inverting of alimentary tract, 81.

FEVER, sometimes caused by xanthin, 439.

Fibrin, swelling, 330.

FISCHER, M. H., and **G. MOORE.** On the swelling of fibrin, 330.

Frog, muscles of thigh, 1.

GELATIN, nutritive value, 234.

GIES, W. J. [See **STEEL** and **GIES**, 343, 378.

Gladiin, hydrolysis from rye, 494.

Glycogen, in embryo pig, 117.

GREER, J. R. See **CARLSON, GREER,** and **BECHT**, 180.

GUTHRIE, C. C., and **F. H. PIKE.** Further observations on the relation between blood pressure and respiratory movements, 451.

HEART, affected by magnesium sulphate, 323.

Heart, after isolation from extrinsic nerve impulses, 407.

LEAVENWORTH, C. S. See **MENDEL** and **LEAVENWORTH**, 117.

LEE, F. S. The action of normal fatigue substances on muscle, 170.

LILLIE, R. S. The influence of electrolytes and of certain other conditions on the osmotic pressure of colloidal solutions, 127.

LOMBARD, W. P., and **F. M. ABBOTT.** The mechanical effects produced by the contraction of individual muscles of the thigh of the frog, 1.

MCLEAN, F. C. See **CARLSON** and **MCLEAN**, 457.

MACNIDER, W. DE B., and **S. A. MATTHEWS.** A further study of the action of magnesium sulphate on the heart, 323.

- Magnesium sulphate, action on the heart, 323.
- MANDEL, A. R. Xanthin as a cause of fever and its neutralization by salicylates, 439.
- MARKS, H. K. See PORTER, MARKS, and SWIFT, JR., 444.
- MATTHEWS, S. A. See MACNIDER and MATTHEWS, 323.
- MELTZER, S. J., and J. AUER. Peristaltic rush, 259.
- MENDEL, L. B., and C. S. LEAVENWORTH. Chemical studies on growth. — III. The occurrence of glycogen in the embryo pig, 117.
- MENDEL, L. B., and P. H. MITCHELL. Chemical studies on growth. — I. The inverting enzymes of the alimentary tract, especially in the embryo, 81.
- MENDEL, L. B., and P. H. MITCHELL. Chemical studies on growth. — II. The enzymes involved in purine metabolism in the embryo, 97.
- MEYER, G. M. An improved animal holder, 362.
- MEYER, G. M. See SALANT and MEYER, 366.
- Metabolism, bone ash in experiments, 343.
- , proteid, 234.
- , purine, 97.
- MITCHELL, P. H. See MENDEL and MITCHELL, 81, 97.
- MOORE, G. See FISCHER and MOORE, 330.
- MURLIN, J. R. The nutritive value of gelatin. — II. Significance of glycooll and carbohydrate in sparing the body's proteid, 234.
- Muscle, fatigue, 170.
- Muscular contraction, its mechanical effects, 1.
- OSBORNE, T. B., and S. H. CLAPP. Hydrolysis of amandin from the almond, 470.
- OSBORNE, T. B., and S. H. CLAPP. Hydrolysis of the proteins of maize, *Zea mays*, 477.
- OSBORNE, T. B., and S. H. CLAPP. The hydrolysis of gliadin from rye, 494.
- Osmotic pressure of colloidal solutions, 127.
- PARANUCLEOPROTAGON, 378.
- Peristaltic rush, 259.
- PIKE, F. H. See GUTHRIE and PIKE, 451.
- PIKE, F. H. See STEWART and PIKE, 61.
- PORTER, W. T. The effect of uniform afferent impulses upon the blood pressure at different levels, 399.
- PORTER, W. T., H. K. MARKS, and J. B. SWIFT, JR. The relation of afferent impulses to fatigue of the vasomotor centre, 444.
- PORTER, W. T., and W. C. QUINBY. Further data regarding the condition of the vasomotor neurons in shock, 500.
- Proteins of maize, hydrolysis of, 477.
- Purine metabolism, 97.
- Pylorus, acid control of, 283.
- QUINBY, W. C. See PORTER and QUINBY, 500.
- RADIUM, elimination from normal and nephrectomized animals, 366.
- Respiration, after isolation from extrinsic nerve impulses, 407.
- , during gastric and peritoneal stimulation, 74.
- Respiratory movements affect blood pressure, 451.
- Respiratory nervous mechanism, resuscitation of, 61.
- SALANT, W., and G. M. MEYER. The elimination of radium from normal and nephrectomized animals, 366.
- Saliva, composition varies with oxygen supply of submaxillary glands, 180, 457.
- Shock, 500.
- SOLLMANN, T., E. D. BROWN, and W. W. WILLIAMS. The acute effects of gastric and peritoneal cauterization and irritation on the blood pressure and respiration, 74.
- STEEL, M., and W. J. GIES. On the use of bone ash with the diet, in metabolism experiments on dogs, 343.
- STEEL, M., and W. J. GIES. On the chemical nature of paranucleoprotagon, a new product from brain, 378.
- STEWART, G. N., and F. H. PIKE. Further observations on the resuscitation of the respiratory nervous mechanism, 61.
- STEWART, G. N. Some observations on the behavior of the automatic respiratory and cardiac mechanisms after complete and partial isolation from extrinsic nerve impulses, 407.
- Submaxillary gland, blood supply affects composition of saliva, 180, 457.
- SWIFT, JR., J. B. See PORTER, MARKS, and SWIFT, JR., 444.

VASOMOTOR centre, relation to afferent impulses, 399.

Vasomotor fatigue, 444.

Vasomotor nerves of cerebral vessels, 206.

Vasomotor neurons in shock, 500.

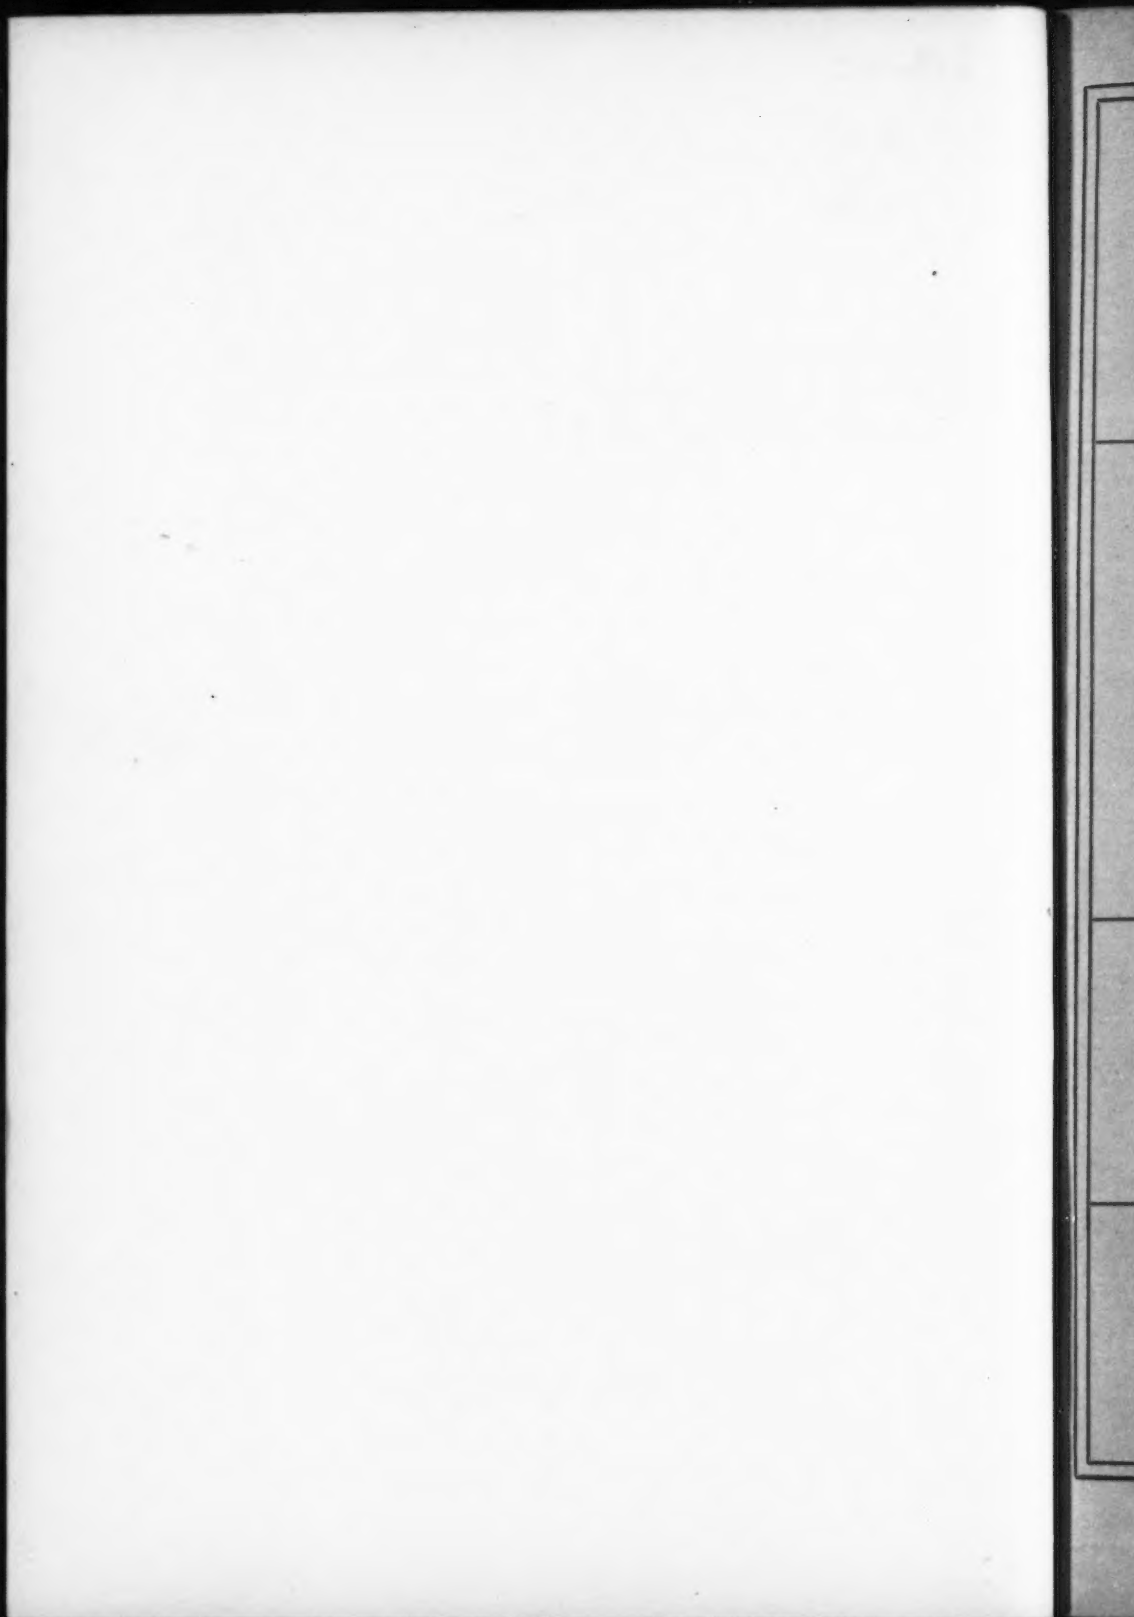

WELKER, W. H. A simple electrical annunciator for use in metabolism experiments, and in connection with fil-

tration, distillation, and similar operations, 358.

WIGGERS, C. J. The innervation of the cerebral vessels as indicated by the action of drugs, 206.

WILLIAMS, W. W. See **SOLLMANN**, **BROWN**, and **WILLIAMS**, 74.

XANTHIN as a cause of fever, 439.

GINN AND COMPANY

1908

CONTENTS

FURTHER OBSERVATIONS ON THE RELATION BETWEEN BLOOD PRESSURE AND RESPIRATORY MOVEMENTS. <i>By C. C. Guthrie and F. H. Pike</i>	451
FURTHER STUDIES ON THE RELATION OF THE OXYGEN SUPPLY OF THE SALIVARY GLANDS TO THE COMPOSITION OF THE SALIVA. <i>By A. J. Carlson and F. C. McLean</i>	457
HYDROLYSIS OF AMANDIN FROM THE ALMOND. <i>By Thomas B. Osborne and S. H. Clapp</i>	470
HYDROLYSIS OF THE PROTEINS OF MAIZE, ZEA MAYS. <i>By Thomas B. Osborne and S. H. Clapp</i>	477
THE HYDROLYSIS OF GLIADIN FROM RYE. <i>By Thomas B. Osborne and S. H. Clapp</i>	494
FURTHER DATA REGARDING THE CONDITION OF THE VASOMOTOR NEURONS IN "SHOCK." <i>By W. T. Porter and W. C. Quinby</i>	500

THE AMERICAN JOURNAL OF PHYSIOLOGY is issued monthly. Each volume will contain about five hundred pages. The price of one volume sent postage free to subscribers in the United States and Canada is five dollars; to subscribers in other countries, five dollars and twenty-five cents. The price of Volumes One, Two, and Three will be six dollars to domestic subscribers, and six dollars and twenty-five cents to foreign subscribers. All subscriptions are payable in advance.

Subscriptions, manuscript, and all other communications should be sent to THE AMERICAN JOURNAL OF PHYSIOLOGY, Box 127, Back Bay Post Office, Boston, Mass., U.S.A.

Contributors will receive fifty copies of their papers free; additional copies may be obtained at cost.

Copyright, 1907, by W. T. PORTER.

Printed by John Wilson and Son, at The University Press, Cambridge, Mass.
Entered at the Boston, Mass., Post-Office as second-class mail matter, Feb. 11, 1903.
